PRODUCT SELECTION GUIDE

TOTAL SYSTEMS

PRODUCT SELECTION GUIDE

This product selection guide will lead you to the right solutions for your design challenges.

Fabral offers metal panels, system components, and accessories to meet all of your needs. Whether an agricultural, light commercial or residential project, exploring this guide will help find your answers.

AGRICULTURAL

Fabral metal roofing and siding systems will work for you by protecting your assets within barns and other agricultural buildings with little maintenance. Metal provides security when durability and longevity are essential.

LIGHT COMMERCIAL

For your light commercial needs, Fabral offers metal roofing and walls with easy installation and minimal maintenance. Design flexibility allows you to use these panels on various applications.

RESIDENTIAL

Homeowners can feel confident that Fabral metal roofing will provide the durability and energy efficiency they deserve. This investment provides a lifetime of satisfaction due to its low maintenance properties and good looks.

FABRALCORE™

You challenge us. And we like it.

Your vision for a building and what you want to achieve makes us think harder. We like it when you bring us a problem because we know we'll find the solution. We have the products, the manufacturing and the know-how. We offer everything you need for the *total* building envelope solution. At our core, we relish a challenge.

CUSTOMER CARE

We're committed to keeping lines of communication open. Whether you need help selecting the right products, troubleshooting an installation issue or you need a box of clips or fasteners our customer care experts are ready to assist. With an average tenure of over 12 years, the FabralCore team is one of the most experienced in the industry. Go ahead, test us. We've got your back.

TABLE OF CONTENTS

Grandrib 3 in Brick Red on the walls and Charcoal Gray on the roof create a classic American look on this barn.

This building features Grandrib 3 siding in Tan with a Grandrib 3 Cocoa Brown roof.

1 1/2" SSR in Acrylic Coated Galvalume, selected for its reflective qualities, covers the roof of this home.

Metal roofs are both functional and aesthetically pleasing. Fabral metal roofing requires minimal maintenance and provides a safe and durable covering to buildings.

Fabral is a market leader in metal wall systems. Panels are available in a variety of colors to meet your design needs.

FABRAL® GRANDRIB 3 PLUS

This enhanced version of the original Grandrib 3 panel has a G-90 coating for better weather performance and durability. Grandrib 3 Plus is a thicker metal panel, increasing strength and appearance, while still providing the traditional benefits of a metal roof. Complete with a range of color selections, this panel is a superior choice.

Project features Grandrib 3 Plus, aluminum soffit and cupolas.

STANDING SEAM PANELS

FABRAL® 1 1/2" SSR

This classic style metal roof protects against all weather conditions while delivering value, beauty, and performance. 1 1/2" SSR is a great choice for residential, commercial, or re-roofing applications. Featuring 24 gauge steel, standard shadow lines and standard factory applied sealant, this panel is designed to perform at optimum levels year after year.

This home features a standing seam roof with Chimney Pot accents and a Snow Retention System.

SYSTEM COMPONENTS

The best metal clad buildings use integrated system components. Fabral always thinks about the whole project, engineering solutions that consider all of the materials needed.

System Components

Flashing and Trim

Soffits

Underlayment

CondenStop

Translucent Panels

Liner Panels

Snow Retention

Gutters

Fasteners

Venting and Closures

Sealants

Fabral offers fully integrated system components. Designed to work together flawlessly, these items are critical to the integrity of the finished project.

Fabral components are engineered for efficient installation and designed for various applications. Your FabralCORE Customer Care representative will help select the right components for your project.

FLASHING AND TRIM

Fabral offers a standard package of flashing and trim for a variety of applications. Flashing is factory-formed at 10’ 6” lengths and available in steel and aluminum with coordinating Enduracote finishes and colors. Flat metal sheets are also available when installer fabrication is preferred. Flashing details and assistance with flashing details are available from your FabralCORE Customer Care representative. Standard details are illustrated in the Fabral Blue Book.

SOFFITS

Soffit panels keep buildings ventilated allowing them to “breathe” and helping to prevent damaging moisture from being trapped in attics and eaves. Various ventilation patterns can be accomplished by alternating solid and vented or perforated panels.

CENTER VENT

SOLID SOFFIT

FULL VENT

Fabral Soffits are available in three pre-formed engineered profiles - two ventilated (center and full) for increased air flow and one solid.

SOFFIT DETAILS

- Full, Center, and Non-Vented Soffit Panels
- Aluminum – recyclable and sustainable
- Pre-cut 16” coverage
- Quad 4 vented – 12.96 sq.in./lineal ft free airspace
- Available in standard and custom lengths

UNDERLAYMENT

Fabral brings the necessary secondary weatherproofing membrane components to the table. Our self-adhering underlayment product (30 year peel & stick) offers easy installation and peace-of-mind for a dry, sound installation. Our synthetic, mechanically fastened systems offer superior protection to old, felt underlayment.

30 YEAR PEEL & STICK

- Watertight Self-Sealing Underlayment
- Asphalt-to-Asphalt Lap System
- Roll Size: 3’ W x 72’ L
- Square Ft Per Roll: 200

30 YEAR SYNTHETIC

- Installation Requires mechanical fasteners
- Roll Size: 4’ W x 250’ L
- Square Ft Per Roll: 1,000

50 YEAR SYNTHETIC

- Installation Requires mechanical fasteners
- Roll Size: 4’ W x 250’ L
- Square Ft Per Roll: 1,000

25 YEAR SYNTHETIC

- Installation Requires mechanical fasteners
- Roll Size: 4’ W x 250’ L
- Square Ft Per Roll: 1,000

CONDENSTOP

Stop condensation with Fabral factory applied CondenStop. CondenStop saves time and money with reduced labor costs and installation time versus other condensation barriers. Easily and effectively prevent condensation and the problems caused by condensation by installing Fabral panels featuring CondenStop.

- Protects assets and investments from moisture
- Can be used in place of traditional vapor retarders
- Adds to interior corrosion protection
- Light gray color enhances the indoor look of an open framing structure roof
- Available on the Grandrib 3 and MP-Panel painted panel offerings

TRANSLUCENT PANELS

Translucent panels transmit natural light affording better work conditions and potentially reducing energy costs. These wall siding panels are ideal for use in agricultural, light commercial, warehouse and industrial facilities. Available in Fiberglass and Poloycarbonate with lengths: 8’, 10’ and 12’

FIBERGLASS

- Made of durable fiberglass
- Easy to clean, flexible, moisture resistant
- Easily and safely installed on sidewalls
- Colors: White (Grandrib 3, Mighti-Rib, Strongrib); Green (Grandrib 3, Fabrib)

POLYCARBONATE

- Virtually unbreakable
- Will not yellow
- Easily and safely installed on sidewalls
- Colors: Clear and White (Grandrib 3,Mighti-Rib, Ridge Caps)

LINER PANELS

Fabral liner panels are perfect for interior projects requiring additional insulation, strength or acoustical control. Additionally these panels are an economical light gauge panel solution for projects requiring partitions.

- Custom cut lengths up to 40’
- Easy to clean
- Polyester paint finish
- Acoustical panels perforated across entire panel
- 36” coverage

SNOW RETENTION SYSTEMS

Snow retention systems are a smart decision. Because metal roofs are naturally slippery, snow and ice move quickly over the smooth surface, possibly damaging plumbing stacks and lower roof planes, as well as possibly endangering people and property. Any project in a freeze/thaw zone should employ a snow retention system.

EXPOSED FASTENER

RTCLSR RTCLSM

RT MINI

CL SNOW GUARD

- Premium polycarbonate plastic with UV stabilizers
- Unique vent rib systems allows for adhesive out gassing
- Three-to-one base-to-blade ratio adds significantly to strength

MINI CLEAR SNOW GUARD

- Premium polycarbonate plastic with UV stabilizers
- Maximum protection, moderately priced
- Two-to-one base-to-blade ratio
- 4.5 sq.in. and gusseted blade snow pocket
- Typically installed by adhering to and mechanically fastened to the roofing panel

#640- Low profile option (not shown)

#20- Designed to fit 1/2" Corrugated panels (not shown)

STANDING SEAM

F-RAIL

- Accommodates up to 4 rails of protection
- Customized rail tubing
- Functions below the standing seams
- Easy to retrofit existing roofs

E-RAIL

- Dual rail, low profile snow retention systems
- Stronger, lighter system
- Receptor slot for custom ornamental attachment

S-RAIL

- Single rail, low-profile snow retention system
- Functions below the standing seams
- Economical snow rail
- Easy to retrofit existing roofs

SL1

SL1 SNOW MEISTER SNOW GUARD

- Available in mill finished aluminum, mill finished bronze, black e-coat primer or custom colors
- Two sizes to accommodate differing seam widths
- Use on Fabral 1 1/2" SSR and Horizon S panels

AP

AP SNOW GUARD

- Available in mill finished aluminum and black e-coat primer
- Three sizes available to accommodate differing seam widths
- Use on Fabral 1 1/2" SSR panel

FASTENERS

The right fasteners, installed correctly will make the project. Understanding which fasteners are best for which application is critical. Be sure to match the correct screw or fastener option with the appropriate roof or wall system. For more information check with your FabralCore representative.

- 1/4" hex head, EPDM/metal washer
- Use with treated lumber

#10-1 PANCAKE HEAD**

- Use with 1 1/2" SSR and concealed fastener panels
- Check with engineering department for spacing with OSB or 1/2" plywood

VENTING AND CLOSURES

Roof ventilation and uniform airflow are key to keeping metal clad buildings "healthy". Correctly engineered vent and closure systems "manage" weather limiting wind-driven rain from entering the ridge area and facilitating "moisture release".

CLOSURES SPECS

- Available in Grandrib 3, Strongrib, 1 1/4" Corrugated, 2 1/2" Corrugated, ProClad and 5V profiles

RIDGE CAP VENT

- Venting factory applied to the ridge cap
- Save up to half of your installation time
- Non-profile specific material
- Clean, dust free installation
- Virtually NO WASTED material
- 1 1/2" x 3" material provides 17 sq. inches/lineal foot free area at the ridge

LP2 RIDGE VENT

- Available in Horizon S, Grandrib 3 and Mighti-Rib profiles
- Lower, custom-fit profile
- Moisture and pest barrier
- Non-obtrusive appearance
- Reduces utility costs
- One-person installation

RV35 AND RV100

- 10' long metal ridge vent
- Variety of colors available

PROFILE FIT VENT-ROLL

- Available in Grandrib 3, 5V and SSR
- 10.66 sq. in. per lineal ft. of ridge (5.33 / side)

SEALANTS

Fabral sealants provide a weather-tight seal against water, wind, dust and dirt. Excellent for use on a variety of metal roof, trim siding, gutters, flashing and downspouts, they are available in over 50 colors (some special order) to coordinate with the full range of Fabral metal finishes.

SEALANT

- Waterproof sealant to fill gaps up to 1"
- UV-resistant
- Permanent flexibility - won't crack
- Standard color: Gray (stocked)
- Up to 50 additional color options (non stocked)

SEALANT TAPE

- 3/16" x 1/4" x 40' (sidelap)
- 3/32" x 1/2" x 50' (endlap)
- 1/8" x 2" x 30'

SEALANT STRIP

- Use at valleys and hips
- 1" x 1" x 19' 6.8" long

ACCESSORIES

A number of accessories are part of the Fabral offering. These items, ranging from pipe boots to door track systems, give you the flexibility to work with FabralCore to customize your project appropriately.

Accessories

Flat Sheets

Cupolas

Backer Rod

Retrofit System

Pipe Boots

Doors

Door Track

Touch-up Paint

Chimney Pots

Custom Copper

Cupolas are an accessory which offer architectural detail to even the most basic of buildings. Cupolas, finials and other architectural components can be customized as necessary.

Doors and door track systems are integral accessories. Whether traditional man doors or over-sized barn doors, Fabral offers engineered systems for an excellent fit.

FLAT SHEETS

Fabral Flat Metal Sheets may be ordered for on-the-job fabrication. A wide variety of substrates are available including aluminum, galvanized steel, Galvalume, copper and stainless steel. Flat sheets may be coated with our premium Enduracote paint system offered in a full range of colors.

CUPOLAS

Cupolas are an excellent way to bring architectural detail to even basic structures. Fabral cupolas are built to order and are offered in a variety of sizes (up to 66" x 66"), shapes and colors. Flashings can be built to any roof pitch and optional windows may be built into the side panels. Base sizes include 24" x 24", 36" x 36" and 48" x 48".

BACKER ROD

Used to fill joints between building materials, Fabral Closed-Cell Backer Rod repels moisture, provides a firm finish to the gap and is easily set into place with spray adhesive. Closed-Cell Backer Rod is suited for use as a backing material for standing seam applications. The round, flexible, continuous lengths of extruded, polyethylene foam is useful in minimizing "oil canning" with the 1 1/2" SSR panel.

RETROFIT SYSTEMS

Fabral metal-over-metal retrofit roof applications offer a structurally sound, non-disruptive and cost effective system for repair and renovating roofs. The system eliminates the need to remove the old roof, saving up to 70% of labor, requires only standard tools and fasteners and has pre-punched pilot holes for rapid fastening. Available in 10' lengths, 16 gauge – 50 ksi steel, the system is laboratory and load tested.

PIPE BOOTS

Base Diameter	Item No.	Pipe Size	
		min	max

Sealing small pipes is made easier with pipe boots from Fabral. The metal base with a dome-shaped boot serves as a covering for vent pipes. Specifications include EPDM: up to 250° F; Silicon: up to 450° F

DOOR AND DOOR TRACKS

Fabral Door Systems include four door types and the complete corresponding track systems. For information on product availability contact your FabralCore representative.

3100 SERIES DOOR

- Pre-hung 4-way universal swing
- 1-3/4" galvanized steel door
- Pressure injected w/polyurethane foam
- Pre-painted w/two coats of polyester paint

5100 SERIES DOOR

- Light commercial post frame entry door
- Rolled edge door panel
- 24-gauge polyester painted galvanized steel
- Heavy internal aluminum stiles and rails
- Heavy-duty 16-gauge 3-1/2" wide painted steel jambs
- 12-gauge stainless steel 4-1/2" x 4" fixed pin hinges

PARTNER DOOR

- Pre-finished/pre-hung 6-bend steel or extruded aluminum
- Pre-hung 4-way universal swing
- 29-gauge steel exterior

RESPONDER DOOR

- Pre-finished/pre-hung 6-bend steel or extruded aluminum
- Pre-hung 2-way universal swing
- 29-gauge steel exterior

DOOR TRACK SYSTEM

- Doors tracks, frames, bottom guide systems
- Trolleys, brackets, latches
- Rollers
- Sliding door accessories

TOUCH-UP PAINT

Fabral offers touch up paints in a full range of Enduracote colors. Contact your FabralCore representative to order the color you require.

CHIMNEY POTS

A collection of elegantly designed European Chimney Pots are part of the Fabral architectural detail offering. Available in a variety of multiple heights and shapes, the pots enhance fireplace draft and functionality. They are lightweight and easy to install and are compatible with steel or masonry flues on wood or gas-burning fireplace systems.

CUSTOM COPPER

Copper is an elegant, long-lasting building material. Fabral Custom Copper offerings include custom fabrication to your specifications as well as the material in coils and flat sheets for on-site fabrication. Perfect for projects in historically sensitive districts, our FabralCore representatives will assist in engineering the correct solution.

ENVIRONMENTALLY CONSCIOUS

One of the most environmentally responsible things we can do is build for life. Using metal building materials ensures long-lasting solutions which will reduce the amount of building materials headed for the landfill.

30 Year asphalt roof vs. 60 Year metal roof

FABRAL AND SUSTAINABLE BUILDINGS

All Fabral metal substrates are excellent options for constructing sustainable buildings. Aluminum, stainless steel, Galvalume, copper and galvanized steel are recyclable materials. Additionally, Fabral metal products contain post-consumer as well as pre-consumer recycled content qualifying the project for LEED points. Since metal is a long-lasting product (up to 60 years) it's inherently a better option than products that do not last as long.

FABRAL FOR LEED

In addition to utilizing a high percentage of post consumer recycled content in their manufacture, metal roofing can be installed directly over an existing roof providing an extra layer of insulation and preventing the old roof from finding its way to the landfill. A key component in evaluating buildings for LEED is the ability to reduce or eliminate building materials from being deposited in landfills.

FABRAL REFLECTIVE ROOFING

One of the most beneficial aspects of metal roofing is its ability to reflect sunlight. Rather than absorbing into asphalt shingles, which can heat up a building, metal roofs have been known to reduce energy bills (during summer months) by up to 20%.

WARRANTY

Fabral offers some of the most competitive, enduring warranties in the industry.
